Jump Bug	Jump Bug's odyssey begins in a city full of monsters. Avoid their deadly touch and flee to the land of volcanoes. Here, molten lava erupts from the craters without warning. Even the cloud of ash around the crater mouth is deadly. Jump Bug must de-toxify it and grab the money bags from extinct underground craters. Then it's on to the ancient pyramid. Beware the thousand-year-old mummies rising from their sleep to destroy you. Escape the tomb on a water fountain, then hold your breath for a full-on undersea battle with three giant squid. The next scene takes you to outer space. Battle the flying saucers and deadly space flies. If Jump Bug collides with them he'll be zapped!
	Version "A" of Jump Bug allows you to change levels using the left (ie. non-playing) player's '0' key.
